SWIVEL

TRAK

The ultimate stop for all your ocean and air tracking needs!

We've got the smarts to blend data from various sources like carriers, terminals, AIS, and more to create a game-changing AI-powered visibility platform. Say goodbye to the headache of inaccurate tracking data predictions because we've covered you!

Sailing Schedules

Optimize route planning

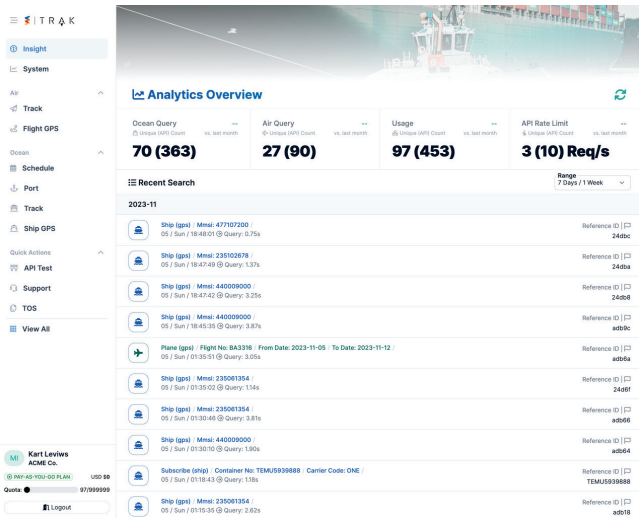

Ocean Tracking

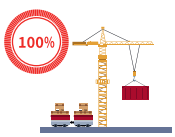

Point to point visibility

Air Tracking

All carriers in one platform

Customs & Terminals
(Major ports in China,USA)

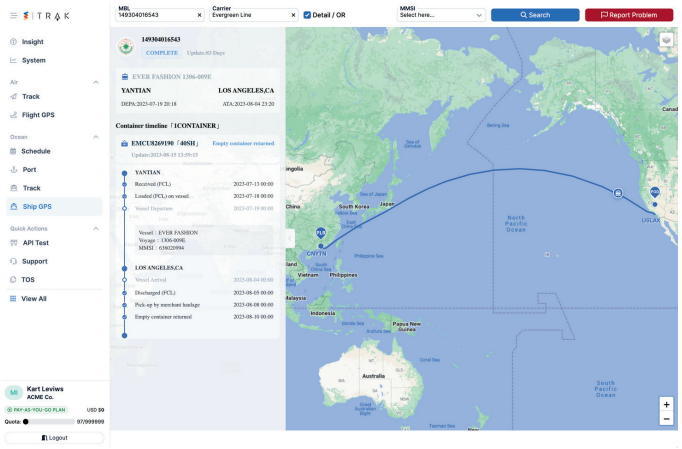

Terminals
(Europe and North America)

Direct connections to the 7 Class I railways in N. America

- Real-time ocean & air tracking.
- Uses port and terminal Events to enhance visibility.
- Consolidates high-quality data from multiple sources (carriers, port/terminal connections, AIS & GPS, plus others).
- Dynamic data on 40+ ocean carriers' sailing schedules by origin and destination pairs for the upcoming 8 weeks.

SWIVEL SOFTWARE

- Ocean + Rail Tracking by direct connections to North America's 7 Class I railways as containers transition from sea to land.
- Direct connections to 60+ major ports in Asia/Europe/N. America/Australasia and terminals worldwide provide access from customs/terminal release at origin/POL to Last Free Date/Available for Pickup events at destination/POD.
- Avoid demurrage charges, enhance drayage coordination, and audit per diem fees.
- Port performance monitoring.

Port Performance

20.72 Days

REGION	DAYS	CHANGE
US West Coast	24.75	-0.7%
US East Coast	20.45	0.8%
US Gulf Coast	11.45	-1.9%

> By tapping into the **Swivel TRAK** API, we're revolutionizing how we handle our shipping processes. Not only are we cutting down on time and costs, but we're also boosting our operational quality. With the ability to predict **exact ETD and ETA**, we're nailing more on-time, in-full deliveries, resulting in fewer penalties. Plus, we're saving precious resources we'd generally use to handle daily tickets for delay notifications, status updates, and arrival/departure times. **Sayonara, old-school tracking!**
