SWIVEL AI

DMS

Redefining Document Management

In today's knowledge-driven economy, Swivel DMS the advanced document management system streamlines your information workflows, enables compliance with evolving ESG standards, centralizing your critical documents and automating key processes.

Unparalleled Access Control

With Swivel DMS, you can effortlessly manage user and document access, ensuring your sensitive information is secure. Our advanced role-based access control and document-level permissions provide unmatched control over your data, empowering you to safeguard your critical assets.

Seamless Subsidiary Support

Swivel DMS is designed with the modern enterprise in mind, offering built-in support for managing subsidiaries and multiple business units. Streamline your operations and maintain seamless control over your document ecosystem, regardless of your organizational structure.

Intelligent Content Automation

Unlock the power of AI-driven capabilities with Swivel DMS. Our AI OCR engine enables automatic cataloging, and file summarization to ensure your documents are effortlessly organized and accessible, saving you valuable time and resources.

Configurable Workflows and Notifications

Swivel DMS's flexible workflow engine allows you to tailor document processes to your specific business needs, while our activity tracking system keeps you informed of all changes, ensuring you're always in the loop.

Comprehensive Metadata and Search

Swivel DMS's document-level metadata and flexible tagging system provide unparalleled search capabilities, enabling you to quickly locate the information you need, whenever you need it.

Robust Versioning and Integration

With default versioning and API-ready integration, Swivel DMS seamlessly integrates with your existing systems, ensuring your document management workflows are streamlined and efficient.
